

After the launch of its much awaited web based application for the ECCR & O domain, Quadra has announced a series of products to cater to the complex processes and operational procedures for not only Construction and Contracting but also for the Engineering and Realty operations as well.

Speaking in a function organized internally, management briefed on the various products and its unique features which will help the companies in the ECCR&O domain stand to **gain** through **optimizing** their operations by **integrating** their processes using Quadra's industry relevant applications.

Apart from Quadra Suite the web based ERP which was launched last July, it has announced "Quadra Lite", "Quadra Plus" and "Quadra J Grid".

Quadra J Grid is the Next generation platform for Engineering, Realty & Operations that is flagship product for Quadra. This platform is capable of Seamless collaboration with point solutions, acts as central ERP for customer activities, sets new bar for performance of ERP.

Quadra Lite is for customers on the move. Quadra Lite is specifically targeted at customers who require the Quadra Suite in their Personal Digital Assistant (PDA). MIS reports are made available on PDA device making it accessible for the decision makers anytime, anywhere.

Quadra Plus is the compact version of Quadra Suite and is targeted at customers whose needs are specific and exclusive.

**"Quadra's innovative product line, process and qualitative marrying of process & technology brings best results for customers and promises consistent growth & profitability"**

**Hari Krishna. A**  
**Managing director & CEO, Quadra**

These are in tune with Quadra's strategic intent to become the Global leader in ECCR&O, as a fiercely innovative organization with Global Customer Focus and to become the market leader for Domain, Technology & Delivery.

**We are members of HP's Developer and Solution Partner Program (DSPP)**
