We are pleased to state that we are using QUADRA - The Construction ERP Solution since 2004 in our Organisation.

QUADRA has helped us in the aspects of Planning and Execution of multiple projects with the centralized control from the Head Office.

MIS Reports have been the major advantage of QUADRA as it gives in nutshell the instantaneous, transparent picture of all the functional aspects of the Organisation thus making decision making easier.

Quadra Software Solution Pvt. Ltd. has been supporting us efficiently in running QUADRA ever since we have entered into contract with them. We have no hesitation in recommending QUADRA to other Organisations of Construction Industry.

For GINA ENGINEERING COMPANY (P) LTD.
