TO WHOMSOEVER IT MAY CONCERN

We at Kumar Properties are customers of M/s Skyline e- tech, Cochin and have been using their product Quadra for the past three years now. This software package has been of tremendous help in regularizing our day to day affairs to the extent that there is hardly any margin for error. Their after sales service being very prompt, gives us the satisfaction of having taken the right decision.

The integration of various modules in the system is consolidated in the Finance & Accounts module, following the effective audit trail. The module also provides connectivity from different locations, in turn creating control on inventory and deriving minimum stock levels.

We highly recommend this software to all those interested in quality management of time and business.

Kumar Properties
