TO WHOMSOEVER IT MAY CONCERN

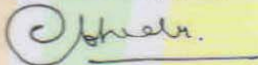

We at Neptune Group are customers of Quadra Software Solutions Pvt Ltd and have been using their product Quadra – The Construction ERP solution for the past six months.

The integration of all the modules with finance module is helpful in effective cost control system and also reduces duplication of work. We are still in implementation stage, but this product is very helpful.

The after sales service of Quadra team is satisfactory. The team is energetic, enthusiastic, self motivated and service oriented.

Construction organizations willing to expand with effective controls must use this software.
