

Quadra ERP solves numerous business issues across your construction, engineering and real estate enterprise, delivering rapid return on investment. The return on investment (ROI) from Quadra ERP implementation is essential and needs to be measured as it provides a yardstick for success.

Quadra ERP ROI can be termed as following:

- Streamlines and standardize all business processes and operations
- Reduces costs and improves quality and efficiency delivering increased profits
- The average inventory is considerably reduced
- Enquiry conversions increased, by being able to respond to customers requirements quickly
- Possibilities of wastage minimized and controlled
- Usage of Manpower, Material, Plant and Machinery at sites is efficiently done & optimized
- Better Cash & Fund Management
- Gives assured direct savings to the tune of the construction turnover (Cost of Land, Material, Manpower, Other)
- Customer retention or Customer loyalty

- Possible customer value in the future that has been created due to Quadra ERP implementation

Return on investment can be in any of the terms and not only in term of financial gain. It can be in terms like increase in productivity, increase in efficiency, or in terms of overall improvement in the performance of the company, better transparency in the operations and of course, the satisfaction of the users. ERP implementation also results in bringing together various departments of the organization like engineering, hrms, finance, and processes. This will help to change the organization's working culture.

For major builders and contractors, QUADRA ERP solution is the only real answer to the question of effective management for the ECCR Industry.

Today QUADRA enjoys the leadership in this market segment with the client base increasing in India and Middle East Asia.
